

Loading Instructions For Strip Poker Professional Data Disks

Hard Disk Installation: Your Strip Poker Professional DATA DISK must be installed in the same hard disk directory from which you run the Strip Poker Professional master program. To install your new opponents:

- insert your DATA DISK into your floppy drive
- log into your **Strip Poker Professional** subdirectory on your hard drive
- type: **A:SPXDD1 -D** for DATA DISK #1
 A:SPXDD3 -D for DATA DISK #3 etc.

if your floppy drive is **B**, then substitute **B:** for **A:** in the above examples (for example, **B:SPXDD6 -D**).

IMPORTANT! Note the space between the DATA DISK number and the **-D**! If the space is not present, you will not get a complete install.
